

FOR THE UNITED STATES

DIRECTV RECEIVER REACTIVATION

When the Tailwind system has been in the hangar or outside the DIRECTV coverage area for an extended period of time you may need to perform a re-activation “hit” to receive programming.

To reactivate the programming service, first make sure that the aircraft is within the U.S. footprint with favorable weather conditions. Power up the Tailwind system and initialize the aircraft’s altitude reference system. Make sure that the antenna has a clear line of sight to the DIRECTV satellite by tuning each receiver to a preview channel and observing the preview channel video.

- If the receiver does not display the preview channel on the cabin monitor, another problem may exist. An activation “hit” will not clear this condition.

Call the Rockwell Collins Member Services Center (MSC) at (714) 929-3500 or (877) 566-1640 with your company name, aircraft type, and serial number, and request “reactivation.” Typical reactivations take about ten minutes, after which time television programs are received normally.

If the Tailwind system loses a programming channel, contact the flight crew. Rockwell Collins updates authorized satellite services, programs and channel numbers periodically. If additional information is required, contact the Member Services Subscriptions Department at (714) 929-3904, or the MSC at (714) 929-3500 or (877) 566-1640 with the program name and channel number.

Tailwind®
TV programming for
the contiguous United States

United States

**CONUS Programming for Legacy,
Tailwind* 100, 300, 500 and 550**

Airborne Office Choice
Entertainment Unlimited
