## High Resolution Terrain Database Change Document

**SUBJECT: Changes between v5 and v6 of the High Resolution Terrain Database**

**FOR HIGH RES TERRAIN DATABASE V6 (CPCI CPN 096-0039-006/096-0040-006, Top Level CPN 810-0406-006), SFC HIGH RES TERRAIN DATABASE V6 (CPCI CPN 096-0040-106, Top Level CPN 810-0406-106), AND HIGH RES TERRAIN DATABASE V6 FOR MFD-2810 (CPCI CPN 096-0F97-006, Top Level CPN 810-0406-206)**

This information applies to all Rockwell Collins High Resolution Terrain database variants used by the CCM-6210 (Database 096-0039-0XX/096-0040-0XX), AFD-37XX (Database 810-0406-1XX), and MFD-2810 (Database 810-0406-2XX).

**IMPORTANT:** The database for the CCM-6210 will not be available until May 1, 2018.

Note: For the CCM-6210, this database is not used for TAWS alerts.

For the MFD-2810, the database top level part number has changed from 810-0406-0XX to 810-0406-2XX.

### **Change summary from High Resolution Terrain Database v5 to v6:**

Extension of Cartesian zone overlap with polar zones for the MFD-2810 database.

Improvement of accuracy in Norway and Svalbard Islands through addition of new sources.

Typical source data updates in Alaska, Guam, parts of the continental US, and at several airports worldwide.
