

VENUE™ CABIN MANAGEMENT SYSTEM

The elite cabin experience, exquisitely refined.

**Rockwell  
Collins**

Building trust every day

## Bring cabin capability into highest definition.

Delivering an exceptional cabin experience to an aircraft requires meticulous attention to detail. With the Venue™ cabin management system from Rockwell Collins, award-winning design details and fine craftsmanship surround you.

Venue offers the trusted, proven reliability for which Rockwell Collins is known. It is far and away the most fielded system of its kind, installed on a variety of personal aircraft. It delivers a wide range of features and technology that are deserving of an aircraft of this caliber.

High-definition display quality. Seamless integration. A ruggedized, fiber-optic backbone that provides tremendous bandwidth for your current and future needs. Customizable control points to satisfy the most discerning passenger. All this and more.

In-seat controllers and displays throughout the cabin feature touch screens with swipe technology to create a more intuitive user interface. Personalizing preferences and dynamically switching users have never been easier or quicker.

It all adds up to an elite cabin system that beautifully complements your luxurious cabin environment.

## Your productivity soars with on-board office capabilities.

Venue's data network, wireless and wired options make the cabin your airborne office. Use your laptop computer and other iOS and Android™ devices.

Stay informed in flight with the latest financial and news updates through Rockwell Collins Jet ConneX (JX) SATCOM integrated with Inmarsat SwiftBroadband. This global connectivity also enables videoconferencing, so you can handle business matters wherever you fly.

# A world of entertainment at your command.

Adapted from the latest in consumer technologies, Venue offers unsurpassed content options, including Stage™ content service, Audio and Video On Demand (AVOD) and an interactive Airshow® moving map for all passengers to enjoy. As consumer technologies advance, Venue is ready – designed to support software upgrades with ease and cost-effectiveness. And wait until you see what's playing on Venue now.

## Your shows

Venue delivers your high-definition content, from Blu-ray™ movies to USB-stored media, with crystal-clear picture quality.

Stage is a convenient, subscription-based service that lets passengers choose from a continually replenished selection of the latest encrypted content and enjoy it on their personal tablets. Movies, TV shows, documentaries and more are all on Stage. With its special access to the latest Hollywood movies, Stage satisfies even the most well-traveled film aficionado.

With Venue's AVOD solution, you can watch your own library of unencrypted movies and videos on the cabin's bulkhead monitor, at your seat or even streamed wirelessly to your DNLA-certified tablet. Other passengers can also watch and enjoy your library videos, at their leisure, on their personal state-of-the-art displays.

Our Tailwind® 550 airborne TV system allows users to feel the exhilaration of watching a live sports event or to stay informed with world and financial news on any display throughout the cabin. They can also stream movies and other personal unencrypted content to their preferred carry-on devices.

Another option for enjoying smoothly streaming, live TV content is the worldwide connectivity of JX and Inmarsat SwiftBroadband.

## Your music

Sit back, relax and listen to your favorite music in high fidelity as you breeze to your destination. Venue offers you Audio On Demand in the cabin or at any seat. Access your music library from your personal USB storage device. You can broadcast music through the cabin speakers or listen individually on your headphones.

With Stage, passengers can choose from a large and regularly refreshed selection of music, listening to it wirelessly through their personal devices.

## Your moving map

Knowing where you are and getting information on where you are going is now at your fingertips, in 3D high definition and more personalized than ever. Explore and customize your view of your Airshow map in your seat via your personal monitor or around the aircraft using the Airshow app on your iPad® or Android tablet. Stage also provides access to Airshow 2D moving maps.

# Innovation in every element.

A distinctive mix of capability, content, aesthetic appeal, flexibility and reliability defines Venue. Because Rockwell Collins integrates all the elements that make up this mix, you can count on a system that seamlessly blends ease of use and forward-thinking functionality.

## Responsive, forward-thinking architecture

At the heart of Venue is something that stays quietly out of the way yet makes itself known through the high flexibility it brings to your cabin: system architecture that can quickly accommodate your changing system needs. It easily incorporates exciting new consumer technologies as they emerge. Venue keeps the latest capability at your fingertips.

Its architecture lets Venue support video resolution up to 1080p. Your system will be fully compatible with high-definition standards such as HDMI, HD-SDI, Blu-ray and, when widely available, UHD.

Dual Blu-ray Disc player

42-inch bulkhead display

24-inch bulkhead display

Touch Screen Switch Panel with brushed aluminum bezel

## Choice of entertainment sources

Venue's Blu-ray Disc player offers you a dual, slot-loaded drive for playing your Blu-ray discs, standard DVDs and CDs. The player is BD-Live and HDCP compliant.

When you bring your personal electronic devices on board, Venue can connect with them. This enables you to enjoy your video, audio or even photos on the cabin's audiovisual system.

Venue also allows you to bring your personal library of content on a USB storage device or load them to our Stage content service to access on demand.

## Stage content service

Elegantly streamlining every aspect of on-board content delivery and management, Stage brings an unrivaled level of capability to your cabin's entertainment capabilities.

Passengers can enjoy movies, TV shows, music, moving maps and periodicals on their preferred mobile devices. A rich variety of content is refreshed monthly from a web-based menu designed specifically for the ease of the flight director.

This convenient, subscription-based service includes add-on options such as special access to the latest Hollywood movies.

10.6-inch HD Personal Touch Screen

Personal Tablet Arm

## Content control that is sleek, sophisticated, intuitive.

Venue. Where elegant form meets powerful function, adding a new level of electronic sophistication to your cabin. The system's content control capabilities make every passenger the driver of his or her flight experience. Interface design is intentionally minimalist and highly intuitive, with easy-to-understand iconography and easy-to-read display menus.

### A family of control capabilities

Give your passengers individual command over their Venue experience with a choice of control types. Venue's control elements are software customizable to accommodate different cabin management system configurations and user needs. They include:

**Touch Screen Switch Panel** – with optimized design for installation and usage near your seat. It provides comprehensive seat and cabin controls. It incorporates state-of-the-art technology, dynamically supports VIP and standard configurations, and can default to a flight status display when not in use. Bezels are customizable to match your unique cabin interior.

**HD Galley and In-seat touch screens** – provide users with the controls to manage the system's entertainment, data and environmental capabilities. Their high-definition, 10.6-inch touch screens use a refined, intuitive and simple user interface, including customizable icons and aircraft layout. The AVOD and Airshow interactive map applications are stored on these smart touch-screen monitors, eliminating the need for additional hardware.

**Venue Cabin Remote App** – a new application for iOS and Android devices that transforms each into a complete cabin remote. The app dynamically recognizes the configuration of your cabin and provides just the control options you need, including your Airshow moving map.

## A relaxing space for larger groups.

Venue accommodates in-flight entertainment systems in cabin areas with high-density seating. Your staff or others who spend time there during flights will find a relaxing environment with a large selection of content for their enjoyment.
