The elite cabin experience, exquisitely refined.

Venue™
CABIN MANAGEMENT SYSTEM
FOR VIP/VVIP AIRCRAFT

Rockwell Collins
Building trust every day
Bring cabin capability into high definition.
Delivering an exceptional cabin experience to VIP and VVIP aircraft requires meticulous attention to detail. With the Venue™ cabin management system from Rockwell Collins, award-winning design details and fine craftsmanship surround you.

Venue offers the trusted, proven reliability for which Rockwell Collins is known. It is by far the most fielded system of its kind, installed on a variety of private, government and business aircraft. It delivers a wide range of features and technology that are deserving of your elite aircraft.

High-definition display quality. Seamless integration. A ruggedized, fiber-optic backbone that provides tremendous bandwidth for your current and future needs. Customizable control points to satisfy the most discerning passenger. All this and more, with no compromises.

Your Venue cabin offers you full wireless capabilities for untethered freedom in controlling your environment and entertainment, streaming content and monitoring your flight path. Venue can do it all.

It all adds up to an elite cabin system that beautifully complements your luxurious cabin environment.
Your productivity soars with on-board office capabilities.

Venue’s data network, wireless and wired options make the cabin your airborne office. Use your laptop computer and other iOS and Android™ devices just as you would at home, for your most productive time in the air.

Stay informed in flight with the latest financial and news updates through Inmarsat Jet ConneX (JX) SATCOM integrated with Inmarsat SwiftBroadband. This global connectivity also enables videoconferencing, so you can handle business matters wherever you fly.
Adapted from the latest in consumer technologies, Venue offers unsurpassed content options, including Stage™ content service, Audio and Video On Demand (AVOD) and interactive Airshow® moving maps for all passengers to enjoy. As consumer technologies advance, Venue is ready – designed to support software upgrades with ease and cost-effectiveness. And wait until you see what’s playing on Venue now.

Stage content service
Familiar and inviting, Stage lets you bring your home infotainment with you on board, everywhere you fly. Stay informed through Stage’s business news, weather and sports feeds, along with destination and event information. Be entertained with our massive library of 400+ licensed Hollywood and international movies, 400+ TV shows, music collections and games.

Stage manages it all with ease – including your personal library of on-board content.

Airshow moving maps
Explore destinations around the virtual globe and follow your flight in real time with Airshow moving maps. Select from a variety of engaging flight information displays and map views.

You can enjoy all the captivating features of Airshow on your iOS or Android devices with our Airshow application. For example, the panorama feature animates your display screen with sweeping, real-time views of the world outside your aircraft – as if your cabin walls and floor were invisible.

AVOD
With Venue’s AVOD solution, you can watch your own library of unencrypted movies and videos on the cabin’s bulkhead monitor, at your seat or even streamed wirelessly to your DNLA-certified tablet. Other passengers can also watch and enjoy your library videos, at their leisure, on their personal state-of-the-art displays.

Tailwind® TV
Our Tailwind family of airborne satellite TV systems is capable of receiving high-definition broadcast channels for the most comprehensive and compelling content available in the air. Watch sports, news and other live content. You won’t miss a thing while you’re traveling in the contiguous United States or between multiple regions worldwide, such as Europe and the Middle East.

Another world of entertainment at your command.

Another option for enjoying smoothly streaming, live TV content is the worldwide connectivity of JX and Inmarsat SwiftBroadband.

Blu-ray™
Venue delivers your high-definition content, from Blu-ray movies to USB-stored media, with crystal-clear picture quality.
Forward-focused design.

New, highly desirable technologies arrive on the consumer scene every year. Fortunately, your Venue system will already be poised to take advantage of many of these technologies. That’s because Venue’s essential design includes capabilities that can deliver the performance you expect today while flexing to the demands of tomorrow’s innovations.

Content control that is sleek, sophisticated, intuitive.

Give your passengers individual command over their Venue experience with a choice of control types. Venue’s control elements are software customizable to accommodate different cabin management system configurations and user needs. They include:

**Touchscreen switch panel** – With optimized design for installation and usage near your seat. It provides comprehensive seat and cabin controls. It incorporates state-of-the-art technology, dynamically supports VIP and standard configurations, and can default to a flight status display when not in use. Bezels are plateable to match your unique cabin interior.

**HD galley and in-seat touchscreens** – Provide users with the controls to manage the system’s entertainment, data and environmental capabilities. Their high-definition, 10.6-inch touchscreens use a refined, intuitive and simple user interface, including easy-to-use maintenance diagnostics and customizable icons and aircraft layout. The AVOD and Airshow interactive map applications are stored on these smart touchscreen monitors, eliminating the need for additional hardware.

*Venue is designed to support exciting new consumer technologies as they emerge.*
Venue Cabin Remote app – A new application for iOS and Android devices that transforms each into a complete cabin remote. The app dynamically recognizes the configuration of your cabin and provides just the individual or zonal control options you need, including your Airshow moving map.

Global support.

The tailoring we provide you as a Rockwell Collins customer extends to our award-winning global support. You can count on our ongoing, customized consultation to ensure our products and services meet your unique needs. And, you can have perfect confidence that Rockwell Collins will be around to serve you for generations to come.

From initial delivery and throughout your aircraft’s life cycle, we’ll be there with you – worldwide – to expertly handle every detail.
Building trust every day.

Rockwell Collins delivers innovative aviation and high-integrity solutions that transform commercial and government customers’ futures worldwide. Backed by a global network of service and support, we are deeply committed to putting our solutions to work for you, whenever and wherever you need us. In this way, working together, we build trust. Every day.
