When disaster strikes.

UrgentLink®
DISASTER COMMUNICATIONS NETWORK

Rockwell Collins
Building trust every day
The Rockwell Collins' UrgentLink® network is the first of its kind, a nationwide HF network utilizing frequencies specifically allotted for disasters.

With HF sites across the country and our highly trusted mission-critical operations centers, UrgentLink provides Beyond-Line-of-Sight radio service that doesn’t rely on communications infrastructure in the disaster zone.

UrgentLink is a public safety-grade, easy to use, managed network service that requires no capital or maintenance costs and significantly reduces training costs. With hundreds of frequencies, users can communicate with each other in the disaster zone and with anyone outside the affected area. On-site radios link together to form a lifeline when telephone, cellular, dispatch and land mobile radio is unavailable.

To provide critical flexibility, our network enables users to communicate in multiple ways. Whether it’s a patch to a phone outside the disaster area, a user-to-user connection inside the disaster area, group calls among users, data messaging or radio system integration with other users, UrgentLink capabilities empower users with the connectivity to do what they do best.

**High-reliability connectivity at your fingertips when it matters most.**

When your primary communications are down, the UrgentLink® Beyond-Line-of-Sight network has you covered.

---

**Direct voice connection**
Communicate with other users directly, within the disaster zone or with a radio outside the affected area.

**Radio patch**
One-touch access to the operations center to be patched to another UrgentLink customer radio.

**Data messaging**
Exchange messages within the disaster zone or to radios outside the affected area.

**Phone patch**
One-touch 24/7/365 access to be patched to a phone by the UrgentLink operations center.

**Group call**
Communicate with a group of users within the disaster zone or with other users outside the affected area.

**Radio system integration**
Connect to a local land mobile radio and patch to any other UrgentLink radio.

**Auto patch**
Automatically connect to other users through the UrgentLink network without an operator.

---

When your primary communications are down, the UrgentLink® Beyond-Line-of-Sight network has you covered.
Building trust every day.

Rockwell Collins delivers innovative aviation and high-integrity solutions that transform commercial and government customers’ futures worldwide. Backed by a global network of service and support, we are deeply committed to putting our solutions to work for you, whenever and wherever you need us. In this way, working together, we build trust. Every day.
